EDUCATION

University of Kansas

Bachelor of Science in Business Analytics and Mathematics

Lawrence, Kansas

May 2027

Honors

International Excellence Award, Black-Babcock Excellence Award, Undergraduate Research Award, University Honors Program

EXPERIENCE

Forward Deployed Software Engineer Intern

Merble

June 2026 – Present

New York City, New York

- Building 4 OAuth-based marketplace app integrations for two major CRMs, enabling clients to securely connect to Merble's pipeline, replacing one-off manual integrations with a scalable model.
- Engineering layoff signal pipeline that ingests and reconciles federal WARN Act and Layoffhedge filings, improving signal accuracy for job-loss distress detection across 8.7M+ worker records.
- Expand a production AI intent-detection pipeline for credit unions by identifying and integrating 3 new data signals, each feeding directly into HELOC, Refi, and Purchase recommendation engines to surface higher-quality leads earlier in the funnel.

Data Engineering Intern

Just Food

January 2026 – May 2026

Lawrence, Kansas

- Initiated review, redesign, and deployment of the official website to enhance user experience and digital presence.
- Analyzed datasets containing 50,000+ donor records using SQL and Excel, uncovering actionable trends to optimize historical performance tracking.
- Cultivated and maintained strategic relationships with 5+ key community partners and donors to drive sustained engagement.

Undergraduate Research Engineer

Dr. Karthik Srinivasan, KU School of Business

December 2025 – Present

Lawrence, Kansas

- Co-author a journal submission to the Journal of Information Systems analyzing 777,902 human-preference observations across 362 LLMs, building a full six-phase Python pipeline covering feature engineering, hypothesis testing, Adaptive LASSO, time-series, and clustering
- Developed a six-phase Python analysis pipeline isolating parameter scale as dominant rating predictors.
- Quantified Pareto concentration in frontier AI development: 8 of 25 organizations produce elite-tier models, and 9 of 37 months account for 80 percent of all frontier rating progress

PROJECTS

NexusAID | Hack KU – Overall Winner, General Track 1st Place – [view project](#)

April 2026

- Engineered an end-to-end blockchain-powered humanitarian payment pipeline on XRP Ledger, tokenizing fiat donations into RLUSD stablecoins with full transaction transparency from donation to disbursement.
- Architected a gasless recipient wallet system dynamically provisioning XRPL wallets tied to Humanitarian IDs, with SMS-based fallback via Twilio enabling fund access in internet-blackout crisis zones.

TapGuard | UPenn Blockchain Hackathon – Winner TRON Track – [view project](#)

March 2026

- Engineered an end-to-end cross-chain cryptocurrency payment solution for Point-of-Sale (POS) and e-commerce platforms, built a "tap to pay" solution, bridging traditional retail with decentralized finance.
- Architected a high-performance dual-chain settlement engine to process stablecoin payments with automated backend reconciliation on the TRON network, significantly reducing transaction overhead and latency for merchants.

AWARDS

Kirkendall Ideation Awards – 1st Place – [view announcement](#)

January 2025

Jayhawk Discovery Challenge (Entrepreneurship) – 1st Place

December 2025

Analytics Information Operations Case Competition – 1st Place

November 2025

Manhattan University International Analytics Competition – Best Poster Award

May 2025

LEADERSHIP

KU School of Business – Professional Development Ambassador

May 2025 – Present

KU Analytics Club – President

April 2025 – Present

University Honors Program – Seminar Assistant, Student Ambassador

August 2024 – Present

Student Union Activities – Assessment Coordinator

December 2024 – December 2025

Big Brothers and Sisters club – Volunteer- Big sister

December 2024 – January 2025
